

The male tree, growing SW of the church, consists of several major branches from a bole of 7'8". This has been frequently trimmed and is quite knobbly, with much adventitious growth. The photos were taken in June 2015.

Girth:

April 2006 - 18' 8" / 5.69m at 3' - Russell Cleaver

January 2012 - 18' 1" close to the ground and 18' 3" at 1' - Peter Norton
