Dorset

Tree 2 of 2

T stem diameter 1.25m measured at ~ 750mm from ground level.

Single from ground level.

Fair health & condition; 25% crown dieback probably due to competition from nearby sycamore.

Location - [///nicely.jacket.interlude](http://nicely.jacket.interlude)

There are also two row-groups of smaller yews beside the road in the NW corner & beside the east boundary. These are 400- 800mm stem diameter.

Brynley Andrews—surveyed January 13th 2025
